Protects driver's vision from high-intensity lights.

Multiple Styles:

2 Shapes:

Cat Eye & Oval

2 Frame Styles:

Chrome & Black

5 Mirror Colors:

Red, Purple, Amber,
Blue, Orange

Stylish Mirror with Built-in Eye Protection

Intense light reflecting off a rear-view mirror can make a ride at night unbearable. With the new Digital Auto-Dimming Mirror by AlphaMirror, high-intensity headlights are automatically dimmed away to protect the rider's vision—*without manual adjustment*. The mirror's sensors adjust the tinting to the current lighting conditions, and improve vision in all weather.

The multiple shapes and styles are designed to match a variety of motorcycles—from *hogs to metrics*. The frame is made from 6061-T6 extruded billet aluminum that is polished and chrome plated. The entire mirror assembly is manufactured to minimize vibration and is fully adjustable in every direction to match the preferences of just about any rider.

No complicated wiring is required for installation. The mirror is powered by a standard CR2450 Lithium battery (average lifespan of 3 years) which is easily replaceable if needed. Mirrors are available in several styles and colors.

High Technology:

The auto-dimming mirror technology was initially developed for use in fighter aircraft to minimize in-flight glare. Now this technology has been adapted by AlphaMirror for the motorcycle industry.

A: Spectral Protection™—Best protection tinting, reduces the eye-irritating “blue” wavelengths and improves your vision and comfort.

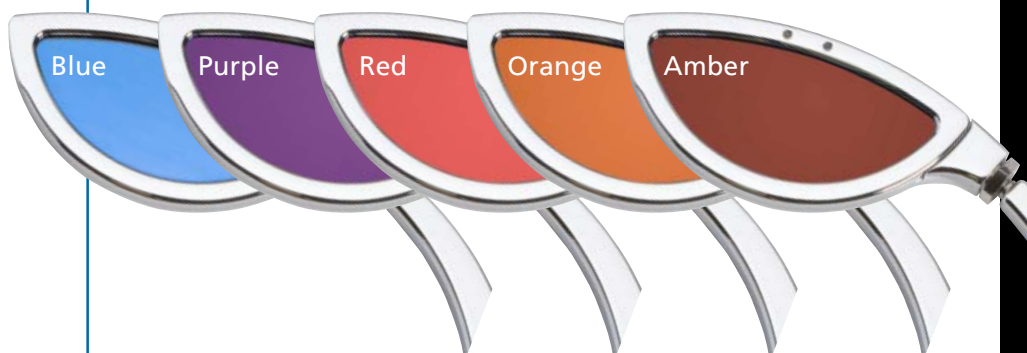

B: AlphaMirror’s auto-dimming sensor automatically adjusts to current lighting conditions and improves visibility in all weather conditions.

C: It is the only auto-dimming rear view mirror that is equal to optical class 1 eye wear standard.

The AlphaMirror, Digital Auto-Dimming Mirror is designed to fit a variety of motorcycles. The billet aluminum frame and stainless steel alloy swivel post make this a very durable mirror. The cat eye and oval frame shapes add sleekness that, with a chrome or black finish, blends with almost any style motorcycle—street to cruiser, factory to custom.
